Property Description

This Luxury home was recently built in 2015 and it features a prime location in the upscale Escaleras neighborhood near Playa Dominical. A quick 5-minute drive down the mountain will take you to the main coastal highway where you will be able to access the tropical beaches around Dominical and Uvita. As we have mentioned time and time again on our website, real estate in the Escaleras area is one of the hottest investments in Southern Costa Rica and this property features everything that makes owning a home here so desirable. The construction (Inside 2,193 sq. ft. / Outside 1,488 sq. ft.) on this beautiful home was brilliantly implemented utilizing high-quality materials and modern building techniques. The main concept for the design was to enhance the incredible Costa Rican environment on the property and the end result hits the mark perfectly. The home has a great flow with an open layout that creates a seamless marriage between comfort and pure luxury.
