Property Description

Located in the heart of Pelada but off the beaten path, this investment opportunity provides a buyer with so many options! There is currently an existing structure on this 600-meter lot, which stands unfinished. The lower floor was taken to about 90%, and the upper floor has exterior walls. Bring your vision to finish the existing structure, or easily remove the structure to build your dream Costa Rica house. Additionally, there is a similar-sized lot available for sale next door, so one could buy both to combine into a large lot. Email with questions or to set up a showing to see how this property could be turned into something magical.
